

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A mobile communication apparatus comprising:

a card controller configured to control a card connected to the mobile communication apparatus, where the card controller reads out a first information from the card;

an interface configured to receive second information from a mobile network; and

a memory, said memory storing a table identifying an operation to be performed by the mobile communication apparatus corresponding to the first and second information, wherein said apparatus is configured to set an operation to be performed by the mobile communication apparatus stored in the table by using the first information and second information.

~~a comparing module that compares a first information stored in a storage unit with a second information received from a mobile network;~~

~~a setting module that sets an operation to be performed by the apparatus when an incoming call is received based on operation decision data stored in memory, wherein the operation decision data comprises decision information based at least on the first and second information.~~

Claim 2 (original): The apparatus of claim 1, wherein the first and second information comprise a country code.

Claim 3 (original): The apparatus of claim 1, wherein the storage unit comprises a removably connected integrated circuit.

Claims 4-25 (canceled)

Claim 26 (new) The apparatus according to claim 1, wherein the first information is a country code of a home network of the mobile communication apparatus, and the table further stores a telephone number to which the operation applies.

Claim 27 (new) The apparatus according to claim 1, further comprising a display that displays a roaming message if a country code from the card does not coincide with a country code from the mobile network.

Claim 28 (new) The apparatus according to claim 27, wherein the display displays caller ID from the mobile network with the roaming message.

Claim 29 (new) The apparatus according to claim 1, wherein the first information includes a country code and a network code of a home network of the mobile communication apparatus.

Claim 30 (new) The apparatus according to claim 1, wherein the operation is at least one of accepting an incoming call, ignoring an incoming, forwarding an incoming call to a voice mail service, and recording a voice mail on the mobile communication apparatus.

Claim 31 (new) A mobile communication apparatus comprising:

- a card controller configured to control a card connected to the mobile communication apparatus, where the card controller reads out first information from the card;

- an interface configured to receive second information from a mobile network;

- a memory, said memory storing a table identifying an operation to be performed by the mobile communication apparatus corresponding to the first and second information, and a time period for permitting the operation.

Claim 32 (new) The apparatus according to claim 31, wherein the operation is receiving an incoming call.

Appln. No.: 10/086,867
Amendment dated February 16, 2005
Reply to Office Action of November 17, 2004

Claim 33 (new) The apparatus according to claim 31, wherein the first information is a country code of a home network of the mobile communication apparatus.
